## ABSTRACT

Our old financial system is failing, country debts and inflation are at an all-time high, it is time for a change. Like it or not, digital currencies are becoming the new normal with the mass adoption from investors and traders all around the world who have discovered a new alternative way of generating income. Most cryptocurrency companies have not yet been accepted globally as units of payment or have widespread utilization of blockchain technologies. With new advancements in blockchain technologies, integration of cryptocurrencies and financial operation systems are now possible. Victorum (VCC) is a cryptocurrency running on Binance Smart Chain with many utilization features. VCC is an all-in-one financial system that allows trading, income generation, cashback, and online payments. VCC token value is based on fluctuations in the cryptocurrency market and tracked by its performance rather than speculating on a single or limited cryptocurrency list. A portion of VCC sales revenue will always be used for future project development, marketing, branding, and other exposure services.

## INTRODUCTION

Disaster strikes every day and Crypto currency is emerging out of the adoption phase. Victorum (VCC) takes advantage of and merges with this already known pattern. In most economies, Digital Currency will replace and surpass most of all traditional methods of our day to-day financial transactions. This is a little-known fact. Combined with using the latest crypto currency platforms, blockchain transparency and peer -to-peer technology, VCC aims is to make a difference for all, victims or not. Vitorum has found a solution by supporting health and wealth globally. We estimate by early 2025 crypto activity will become even more and more dominant. At this time investors in Victorum will not only benefit those in need of disaster relief but also for one's self as an investor. Our low-cost, easy-to-use platforms make it ideal and easy to use.

Victorum equals hope for the future.

## CORE VALUES

Transparency, Honesty, and Goodwill to our global investors and partners. We believe these values are the keys to a long-term, successful relationship.

## VISION

We aspire to improve our world and the lives of our Global members with the adoption and use of cryptocurrencies as an alternative way to earn income, invest, save and make payments.

## PURPOSE AND MISSION

Victorum(VCC) upholds humanity's basic fundamental right to better days, no matter what their economic situation finds them in.

VICTORUM provides the preparedness needed for One to have the control over disaster relief efforts and their own finances. In other words, contributing to the well-being of others in need and themselves, simultaneously. Especially in times of tragedy. Sadly, disaster strikes all over the world, all the time, at any moment, and that means right now. What VCC has done is create a secure digital Token and NFT options that are transparent based upon decentralized blockchain technology. VCC will enable our members to save, earn rewards, invest, withdraw and transfer funds. (soon to come Victorium's own unique integrated exchange.) To pay for goods and services anywhere in the world using multiple platforms Global members, Partners, Investors, Homeless, Veterans, those affected by disaster and children will be the primary beneficiaries through the mass adoption of our unique asset.

## BEP20

BEP-20 is a blueprint for tokens that defines how they can be spent, who can spend them, and other rules for their usage. It represents a token standard on Binance Smart Chain that is designed to give users more options such as faster block times, cheap transaction costs and extends the most common Ethereum token standard. BEP-20 was conceived as a technical specification for Binance Smart Chain, to provide a flexible format for developers to launch a range of different tokens. These could represent anything from shares in a business to dollars stored in a bank vault.

Binance Smart Chain is considered to be a supreme blockchain network, as the key standouts of this network are the functionality of Smart contracts and the compatibility with Ethereum Virtual Machine (EVM). As the Binance Smart Chain or BSC runs independently, if the Binance Chain were to go down, BSC would still run efficiently. Since the Binance Smart Chain network holds the status of being EVM integrated, developers can link their Ethereum based projects and dApps with this platform.

### Benefits and Advantages of BEP20 Token:

- One interesting feature of the BEP20 token is that other tokens from other blockchains can be pegged on this token.
- An important aspect of BEP20 tokens is that they create a token contract on the smart chain network.
- As an incentive for those acting as validators transferring BEP20 tokens, the BNB token is provided. It can be collected as a transaction fee, quite similar to what is observed with the BEP2 token on the Binance Chain.
- The dual chain architecture that compliments both the Binance Chain and the Binance Smart Chain Network and allows users to make the best of both worlds. The former will provide super-speed trading while the latter allows Defi developers to launch dApps without taxing the Binance Network.
- The cross-chain compatibility allows for easy swapping of BEP2 tokens with their BEP20 equivalents, thanks to the Binance Chain Wallet extensions.

## SMART CONTRACT

A smart contract is a transaction protocol that is intended to automatically execute, control, or document legally relevant events and actions according to the terms of a contract or an agreement. The objectives of smart contracts are the reduction of need in trusted intermediaries, arbitrations, and enforcement costs, fraud losses, as well as the reduction of malicious and accidental exceptions.

Nick Szabo first proposed smart contracts in the early 1990s, coined the term, referred to as a set of promises, specified in digital form, including protocols within which the parties perform on these promises. In the year of 2015's implementation of blockchains, the smart contract is mostly used more specifically in the sense of general-purpose computation that takes place on a blockchain or distributed ledger.

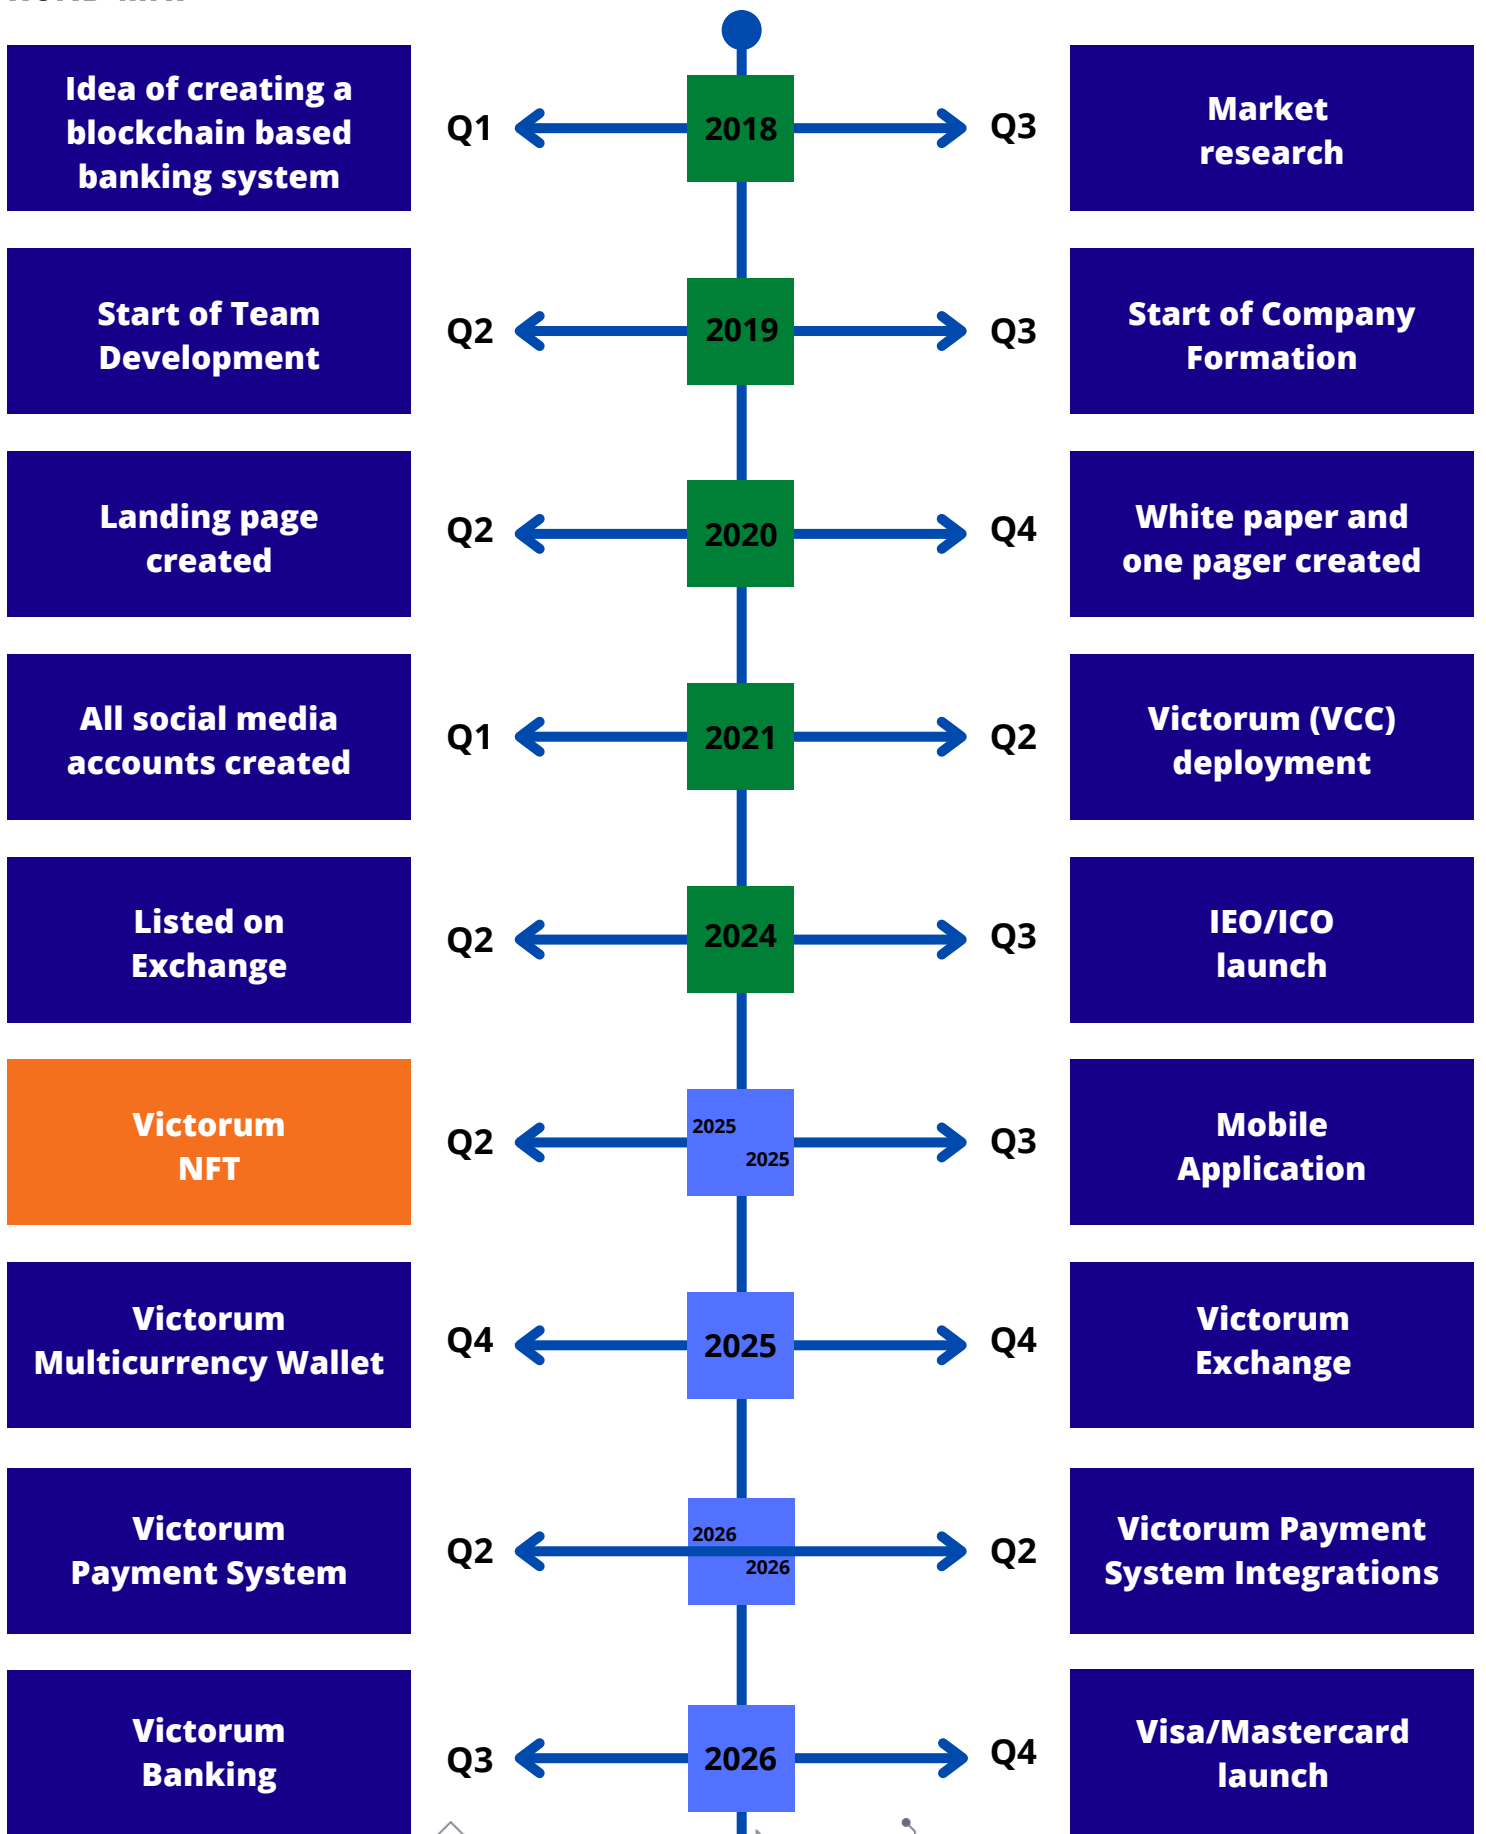

According to the US National Institute of Standards and Technology, the smart contract is described as a collection of code and data, which is sometimes referred to as functions and state that is deployed using cryptographically signed transactions on the blockchain network. In this interpretation, used for example by the Ethereum Foundation or IBM, a smart contract is not necessarily related to the classical concept of a contract but can be any kind of computer program.

On the other hand, Legal Academics claimed that smart contracts are not legal agreements, but rather means of performing obligations deriving from other agreements such as technological means for the automation of payment obligations or obligations consisting in the transfer of tokens or cryptocurrencies. Additionally, other scholars have argued that the imperative or declarative nature of programming languages can impact the legal validity of smart contracts.

A smart contract can also be regarded as a secured stored procedure as its execution and codified effects like the transfer of some value between parties are strictly enforced and cannot be manipulated after a transaction with specific contract details is stored into a blockchain or distributed ledger. That is because the actual execution of contracts is controlled and audited by the platform, not by any arbitrary server-side programs connecting to the platform. Similar to a transfer of value on a blockchain, deployment of a smart contract on a blockchain occurs by sending a transaction from a wallet for the blockchain. The transaction includes the compiled code for the smart contract as well as a special receiver address. That transaction must then be included in a block that is added to the blockchain, at which point the smart contract's code will execute to establish the initial state of the smart contract. Such transactions with a smart contract can invoke other smart contracts. These transactions might result in changing the state and sending coins from one smart contract to another or from one account to another.

# ROAD MAP

## VALUE

The root word of Victorium is Latin, meaning personal victory, conquest over adversity and to triumph. Through VCC's careful consideration and our ability to provide economies with core financial services and relief efforts in times of distress. Investors in Victorium are creating a win win situation for the betterment of people's lives on both sides of the coin. Pun intended. For, the value of your VCC token investment that while also benefitting those in need. And who does not want a better life? For example: can you think of anyone? Our benefits are meant to be life changing to all by providing personal financial growth, freedom and help when in need.

Our price projections are expected to 10-100x double within the next years (2025) quarter. Take advantage of the VCC opportunity for all the right reasons and future development. View our links and educate yourself further more. Consider Victorium as humanities next digital Golden ticket.

# MARKETING

## STRATEGY

- CONSOLIDATE THE BRAND OF VCC IN GLOBAL MARKETS.
- CREATE POSITIVE INTERACTIONS WITH TECHNOLOGY PLATFORMS SPECIALIZED IN CRYPTOCURRENCY CONTENT, NEWS, AND SOCIAL NETWORKS.
- STRATEGIC MARKETING AND PUBLIC RELATIONS GLOBAL PARTNERS FOR HIGH-BRAND PRODUCT AND SERVICE AWARENESS.
- TARGET TRADITIONAL AND DIGITAL MEDIA SOURCES TO ADVERTISE VCC'S SERVICES WORLDWIDE.
- ESTABLISH INTERNATIONAL SALES DISTRIBUTION NETWORK.
- FOCUS ON THE CRYPTO INDUSTRY AND USER TESTIMONIES.

## VCC GLOBAL PAYMENT SYSTEM

Victorum Banking and Payment System enables individuals and businesses to seamlessly use crypto and fiat currencies as payment methods and borderless international transfer of funds. VCC uses the Binance Smart Chain which is a completely independent, standalone blockchain that continues even if the main Binance Chain ever goes offline. VCC Global Payment System integrates seamlessly with the most popular payment gateway platforms today, simplifying our user's experience.

### FUNCTIONALITIES:

- Online / Offline VCC Global Payment System.
- Store favorite crypto and fiat currencies securely using Victorium online or mobile app.
- Instant International money transfers.
- Email and SMS fund transfers to relatives, friends, and partners.
- Make worldwide purchases, utility, and service payments using Victorium token, VCC VISA / MasterCard as well other supported crypto and fiat currencies.
- Easy deposit of crypto or fiat currency to your account.
- Easy to use funds conversion cryptocurrency-fiat, cryptocurrency-cryptocurrency, or fiat-cryptocurrency.
- Global members receive company profit rewards, savings interest, cashback, and discounts for using Victorium Payment System.
- Worldwide adoption and business integration using Application Programming Interfaces (APIs) through VCC Payment System allowing businesses to accept payments in supported crypto and fiat currencies.
- Merchant notifications of customer payments via Email or SMS text confirmations.

## WHY VICTORUM (VCC)

Cryptocurrencies are start-up companies and fail because they are not accepted globally as units of payment or have widespread Utilization and are not considered reservable currencies yet. With thousands of new blockchain projects, competition is fierce. It is important to remember cryptocurrencies and blockchain technology are the new cutting-edge technology that is being adopted worldwide as the new "investment and wealth creation" of the future. Cryptocurrencies have created more new financially free people since their inception than any other investment opportunities in human history.

Victorum (VCC) is at the forefront of this new technology and the future of the digital world. We are a decentralized all-in-one global financial and payment platform that rewards and benefits global members and partners.

VCC has the plans and technology to have our cryptocurrency adopted globally as units of payment. The versatility of VCC as an investment, real-time currency rates, which is secure, has lightning-fast transfers that cost less than traditional ways of transferring money today. VCC Visa/MasterCard will be used worldwide for in-person and online purchases, everywhere Visa/MasterCard is honored. VCC has a maximum supply of 10 Billion tokens and no more can ever be issued, adding more value to our coin than traditional fiat currencies.

### **Advantages of investing in VICTORUM:**

Investing in Victorium project at the initial stage, Global members will receive the greatest investment opportunities and profit.

Term investment and holding of Victorium tokens will earn an additional percentage of tokens depending on terms. Victorium cryptocurrency guarantees the availability of VCC tokens anytime, anywhere, anyplace 24/7, 365 days a year.

Victorum members benefit from the future secure Victorium Banking and Payment System, which is lightning-fast and costs less for cryptocurrency and international money transfers. Additional benefits include annual profit rewards, cashback, savings interest, and more.

The traditional financial system is failing, Investors and Merchants losing rather than gaining, international funds transfer fees are high, transactions taking longer time as

## SECURITY

The continuous growth of networks within the Victorium infrastructure may expose a large number of single-points-of-failure, which may, in turn, deteriorate the services envisioned. These security threats can exploit vulnerabilities of various components such as applications/interfaces, network components, software, firmware, and physical devices, existing at different levels. Rest assured Victorium foresees such problems and will address these threats accordingly. The users of Victorium will also interact with these components through protocols which also may become dismantled affecting their own security measures. There are sufficient countermeasures for security threats in place to address vulnerabilities of this interaction at different layers to attain a specific security level. The Victorium security features have been prepared to tackle the plausible threats as tabulated. Victorium Token security protocols are being created on multifactor authentication models, ensuring no single point of attack is available to hackers. Each access to the system is authorized, authenticated, and logged. Continuous autonomous monitoring of logs and active countermeasures to block access of suspect users based on integrations are in effect.

## REPORTING

The development and implementation of new standards might take years depending upon any new regulation. Currently, Victorium provides reporting based on best effort in compliance with existing legislation, periodic reporting that will include the portfolio performance, and updates about its performance in the cryptocurrency market. Both, the reports as well as daily updates will be made available to the investor portal of the Victorium main website. Victorium Token also is viewable and traceable at any time within the Binance Smart Chain explorer.

## LEGAL DISCLAIMER

1. VICTORUM is not providing you or anyone else legal, financial, or tax advice regarding any matter. Check to see if you are legally able to participate in VCC's private and or public offering. Potential investors should consult with their own attorney, accountant, and or advisors about the above matters.
2. VICTORUM Participants in addition to legal requirements should inform themselves of any tax consequences within their place of citizenship, residence, or place of business before acquiring, holding, or selling VCC. Consider your countries foreign exchange policies that may be relevant thereto. Law may restrict the distribution of this White Paper and the offer to trade and sell VCC in certain jurisdictions. This White Paper does not constitute an offer to sell, solicit, or offer to purchase to any person for whom it is unlawful to do so.
3. It is the responsibility of any person wishing to take part in VICTORUM's private opportunity to invest and buy VCC is to inform themselves of and to observe all applicable laws and regulations.
4. Individuals who participate in this opportunity will have the option to buy, trade or sell their VCC through Legal entities, for example, "AzBit, Binance, Finexbox, P2PB2B or similar exchange platforms" that will conduct the relevant sales and trades of VCC. Consider the English language version of all VCC communications, media and documentation to be the only official version.

# RISK

PROSPECTIVE HOLDERS OF VCC'S SHOULD CAREFULLY CONSIDER ALL RISKS AND UNCERTAINTIES ASSOCIATED WITH ANY CRYPTOCURRENCY AND THEIR UNDERLYING CONCEPTS. AS WELL AS ALL INFORMATION SET OUT IN THIS DOCUMENT.

IF ANY SUCH RISKS AND UNCERTAINTIES DEVELOP INTO ACTUAL EVENTS, THE COMPANY, ITS FINANCIAL CONDITION, RESULTS TO OPERATIONS, AND PROSPECTS OF THE COMPANY MAY BE ADVERSELY AFFECTED. IN SUCH CASES YOU MAY LOSE ALL OR PART OF THE VALUE OF YOUR VCC TOKEN.
